Item No		Quantity	Rate	Amount
	<u>SECTION NO 1</u>			
	<u>BILL NO. 1</u>			
	<u>PRELIMINARIES</u>			
	All prices/rates to be net, excluding Value Added Tax			
	<u>General</u>			
	i) The agreement is to be the JBCC Series 2000 Principal Building Agreement (Edition 4.1) prepared by the Joint Building Contracts Committee, March 2005			
	ii) The preliminaries are to be the JBCC Series 2000 Preliminaries prepared by the Joint Building Contracts Committee, March 2005 edition and shall be deemed to be incorporated herein			
	iv) Where standard clauses or alternatives are not entirely applicable to this contract such modifications, corrections or supplements as will apply are given under each relevant clause heading			
	iii) Tenderers are referred to the abovementioned documents for the full intent and meaning of each clause thereof (hereinafter referred to by heading and clause number only) for which such allowance must be made as may be considered necessary			
	v) Where any item is not relevant to this specific contract such item is marked N/A (signifying "not applicable")			
	vi) If Alternative A as set out in clause B10.3 hereinafter is to be used for the adjustment of the preliminaries each item priced is to be allocated to one or more of the three categories, where "F" denotes a fixed amount (amount not to be varied), "V" denotes an amount variable in proportion to value and "T" denotes an amount in proportion to time

62	Programming for the works (B4.2)			
	Clause B4.2 is hereby amended by the addition of the following: Programme: The contractor and the principal agent shall agree to a Contract Programme for the control of the Works. The contractor shall submit a draft of the Contract Programme and method statement to the principal agent for approval together with the tender. The contractor shall ensure that the contract programme: 1. Shall be prepared and drawn up to comply in all respects with the requirements of this Agreement. 2. shall be drawn up using logic developed during the tender period and complies with the planning requirements of the Client. 3. shall be in accordance with the dates given herein for possession and practical completion; and 4. shall be in sufficient and approved detail to ensure effective control of the work, including all items necessary to enable calculations to be made for the distribution of finance during the cashflow analysis. 5. shall be accompanied by a full written method statement			
	Carried Forward		R	
	Section No. 1 Bill No. 1 Preliminaries & General INDEPENDENT DEVELOPMENT TRUST			

Brought Forward The principal agent shall examine and comment on the contract programme and method statement within two weeks of its submission. Following on these comments the contractor shall amend the contract programme and method statement as may be necessary and submit the final contract programme and method statement to the principal agent for approval within a further two weeks thereafter. The contract programme shall be processed by computer and be presented to the principal agent in the form of logic charts and bar charts in such a way as to determine the critical path and the float on non-critical activities. All supporting printouts must be available to the principal agent on demand. The acceptance by the principal agent of the contract programme, or any revision thereof, does not necessarily sanction the accuracy of validity of the network logic, the correctness of individual activities in terms of description or duration, the comprehensiveness of networks or the discrepancies between drawings and any other documents presented by the contractor, and in no way relieves the responsibility of the contractor to comply with the requirements of the Agreement. No policy decisions other than the planning requirements, procedures and policies provided, will be enforced on the contractor regarding construction of the project and the contractor shall be responsible at all times for ensuring the accuracy, validity and reasonableness of programming information. Documentation will not be available in complete detail at the date of award of the contract. Non-availability of information will not be deemed an excuse for non-presentation of programmes. In the event of inadequate information, the contractor shall estimate the predicted time applications on available information and quality the submission accordingly. Development of the contract programme and method statement Within two weeks of award of the contract, the contractor shall submit an updated contract programme and written method statement which shall include the		R	
Carried Forward Section No. 1 Bill No. 1 Preliminaries & General INDEPENDENT DEVELOPMENT TRUST		R	

Brought Forward latest information in sufficient detail to permit comprehensive monitoring. Progress of the works will be monitored by the principal agent. The contractor shall liaise with the principal agent in order to provide whatever information is required to facilitate such monitoring. Revisions to the contract programme Revisions to the contract programme may be introduced periodically by the contractor subject to compliance with the contract completion and handover dates. Providing the required consultation between the relevant parties has highlighted the implications of the required changes, the programming strategy on the project may be changed and the changes noted and specified on logic charts delivered to the principal agent. The changes to the programme will be recorded as firm and binding once the principal agent has sanctioned the said changes. A revision to the programme will not invalidate the contractual completion dates and applications for extensions of time will be processed by the principal agent in accordance with the conditions of contract. Should the contractor fail to submit a request for revision to the construction programme , progress monitoring shall be based on the latest revised programme sanctioned by the principal agent. The contractor shall make all his necessary revisions on the approved network sheets clearly marking, inter-alia, the logic changes and duration changes. These will then be processed by the necessary parties and then approved in the normal manner. Progress Monitoring The contractor shall provide regular progress reports showing actual and expected progress against the latest contract programme. Progress reports shall be submitted at each site progress meeting and shall outline the progress against key target dates and deviation which has occurred against the most recently updated control programme due to the progress		R	
Carried Forward Section No. 1 Bill No. 1 Preliminaries & General INDEPENDENT DEVELOPMENT TRUST		R	

Brought Forward reflected in the as-built construction programme. The status of each activity must also be reported as follows: Target - If the activity is not complete, the latest predicted completion date shall be supplied. Start - If the activity has commenced, the actual date shall be supplied. Finish - If the activity is complete, the actual completion date shall be supplied. Problems which may occur during execution of the contract must be specifically identified in progress reports under a separate section of the contractor's report. Should problems occur during the execution of the contract or the scope of work be increased or decreased, the contractor may be requested to increase the extent or the detail of the programme. The principal agent may recommend action to be taken by the contractor, including the revision of resource levels, but this information will not be binding on the contractor unless the recommendations are enforced in terms of the conditions of contract by the principal agent and will in no way relieve the contractor's responsibility to comply with the requirements of the Agreement. Extension of time Any extension of time which is granted by the principal agent will be annotated to affect selected activities in the programme and the associated activities will be incorporated by revisions to the programme by the contractor. Should the additional activities or the extension of time on existing activities fall on a non-critical area of the programme, extension will be limited to the activities affected by the said additional activities or extensions and the contract dates shall not be affected. If, however, the additional activities fall on the critical path, the principal agent shall take this into account when granting any extension of time in terms of the conditions of contract. The contractor agrees that the contract completion date		R	
Carried Forward Section No. 1 Bill No. 1 Preliminaries & General INDEPENDENT DEVELOPMENT TRUST		R	

Brought Forward (i.e. the date for practical completion) has been stipulated in the contract for the benefit of the employer, so that, without derogating from the generality of the foregoing principle it is provide that: 1. The contractor shall not be entitled to deliver the site and the works to the employer prior to the contract completion date and 2. Should there for any reason be any float period indicated in the contract programme prior to the contractual completion date then this float period shall be utilized to absorb any delays or extensions of time without affecting the contract completion date. 3. The contractor shall, at all times, ensure that, notwithstanding the approval or sanctioning, reviewing or inspection of a programme or any revision of a programme by the principal agent in the foregoing terms, practical completion and completion of the works shall take place strictly in accordance with this Agreement. A defective or faulty programme, even if so sanctioned, approved, reviewed or inspected by the principal agent, shall therefore not constitute a cause for granting an extension of time for completion of the works or for entitling the contractor to the payment by the employer in terms of the contract of any loss, compensation or damage whatsoever. The contractor acknowledges that the principal agent's foregoing participation in the approval of development of, revisions to and updating of the Contract Programme shall take place in consultation with the principal agent. The contractor shall therefore provide the principal agent with such co-operation and/or information and/or access as they may reasonably require for such purposes. <u>SECTION NO.2</u>			
<u>BILL NO. 01</u>			
<u>FOUNDATIONS</u>			
<u>PREAMBLES</u>			
For preambles see "Construction Works: Specification; General specification (PW371-A) Edition 2.0"			
<u>SUPPLEMENTARY PREAMBLES</u>			
<u>Backfilling</u>			
Fill material shall be placed in lifts of not more than 150mm.			
Compaction density to be controlled using DCP apparatus to a maximum of 30mm/blow the MOD			
AASHTO percentage to be achieved will be as stated on the description.			
Where backfill is required on both sides of walls, backfill both sides simultaneously.			
Where compaction of fill material behind retaining walls is done using mechanical rollers, the rollers must be kept 500mm away from the wall and this 500mm portion must be compacted with a wacker.			
<u>Carting away of excavated material</u>			
Descriptions of carting away of excavated material shall be deemed to include loading excavated material onto trucks directly from the excavations or, alternatively, from stock piles situated on the building site.			
Carried Forward			R
Section No. 2 Bill No. 1 Foundations (Provisional) INDEPENDENT DEVELOPMENT TRUST			

Brought Forward			R
<u>Cost of tests</u>			
The costs of making, storing and testing of concrete test cubes as required under clause 7 "Tests" of SABS 1200G shall include the cost of providing cube moulds necessary for the purpose, for testing costs and for submitting reports on the tests to the architect. The testing shall be undertaken by an independent firm or institution nominated by the contractor to the approval of the architect. (Test cubes are measured separately)			
<u>Formwork</u>			
Description of formwork shall be deemed to include use and waste only (except where described as "left in" or "permanent"), for fitting together in the required forms, wedging, plumbing and fixing to true angles and surfaces as necessary to ensure easy release during stripping and for reconditioning as necessary before reuse. Formwork to soffits of solid etc. shall be deemed to be slabs not exceeding 250mm thick unless otherwise described. Formwork to sides of bases, pile caps, ground beams, etc. will only be measured where it is prescribed by the engineer for design reasons. Formwork necessitated by irregularity or collapse of excavated faces will not be measured and the cost thereof shall be deemed to be included in the allowance for taking the risk of collapse of the sides of the excavations, provision for which is made in "Earthworks"			
<u>EXCAVATION, FILLING, ETC</u>			
<u>Excavation in earth not exceeding 2m deep:</u>			
1	Trenches	m3	912
2	Holes	m3	12

<u>SECTION NO.2</u> <u>BILL NO. 06</u> <u>CARPENTRY AND JOINERY</u> <u>PREAMBLES</u> For preambles see "Construction Works: Specification; General specification (PW371-A) Edition 2.0" <u>SUPPLEMENTARY PREAMBLES</u> <u>Pre-fabricated metal connected timber roof trusses:</u> All trusses shall be fabricated by an approved truss manufacturer who holds a current certificate of compliance awarded by the Institute for Timber Construction <u>Timber</u> Timber for trusses to be South African softwood and shall be in accordance with the grades as defined in SABS Specification No 563 or as defined in SABS Specification No 1460 <u>Bolts</u> Bolts shall be in accordance with BS 4190 or SABS 135 <u>Shear plates, tooth connectors and split rings</u> Shear plates, tooth connectors and split rings shall be in accordance with BSS 1759 : 1960 and installed in accordance with the CSIR Publication HOUT 468, "The Design, Manufacturing and Erection of Timber Trusses"			
Carried Forward Section No. 2 Bill No. 6 Carpentry & Joinery INDEPENDENT DEVELOPMENT TRUST			R

Brought Forward <u>Washers</u> Square or round washers of the following dimensions shall be used with all bolts: 1. Bolts up to 8mm diameter: Washers shall be minimum 25mm wide of minimum 2,50mm thickness 2. Bolts up to 12mm diameter: Washers shall be minimum 36mm wide of minimum 4,00mm thickness 3. Bolts up to 20mm diameter: Washers shall be minimum 60mm wide of minimum 5,00mm thickness <u>Metal connector plates</u> Metal connector plates shall be fabricated out of not less than 1mm thick drawn quality galvanised steel. The steel shall have a minimum yield strength of 228MPa and a minimum ultimate tensile strength of 330MPa. The corrosion resisting coating shall be not less than 275g/m2 commercial class hot dipped galvanising as per SABS 934 before stamping. All connector plates shall have been tested by the CSIR and be of a size capable of transmitting the forces between members of a truss without exceeding the design values published in the CSIR report. <u>Truss construction</u> Trusses shall be constructed in jigs specially designed to ensure the correct profile, overhangs and cambers Where metal connector plates are used all joints are to be close fitted butt joints made by precision pressing of the metal connector plates into each side of the joint. <u>Truss design</u> All trusses shall be designed by a registered Professional Engineer in accordance with SABS 0163 ("Design of Timber Structures") and Code 0160 ("Loadings")		R	
Carried Forward Section No. 2 Bill No. 6 Carpentry & Joinery INDEPENDENT DEVELOPMENT TRUST		R	

Brought Forward <u>Truss spacing</u> The truss centres shall be less than or equal to that as described in this bill for each respective truss <u>Truss pitch</u> The truss pitch shall be as described in this bill for each respective truss type <u>Truss loading</u> Trusses shall be designed for a live load of 0,50kN/m² and dead load as specified under the sub-heading "Specific load specifications for roof trusses" <u>Shop drawings, design and erection guarantee certificates</u> It will be expected from the Contractor to timeously prepare, submit and obtain the necessary approvals from the Representative/Agent in respect of the required shop drawings, design and erection guarantee certificates as specified <u>Dimensions</u> All dimensions given in the descriptions of the trusses are nominal and actual measurements are to be obtained by actual measurements taken on the site before design or fabrication commences. <u>Erection</u> All trusses are to be hoisted and erected strictly in accordance with the procedures and recommendations of the manual "The Erection and Bracing of Timber roof Trusses" as published by the Institute for Timber Construction and the CSIR, or the SABS Code of Practice "The Design, Manufacture and Erection of Timber Roof Trusses", or as designed and detailed by the designer.		R	
Carried Forward Section No. 2 Bill No. 6 Carpentry & Joinery INDEPENDENT DEVELOPMENT TRUST		R	

Brought Forward		R
<u>Design system</u>		
The design system as documented in this bill is based on the "MiTek" system and all references given in the descriptions are related to specific type of trusses based on this design system. However, Contractors are to note that any design system of similar quality may be used subject to the prior written approval of the Representative/Agent.		
<u>Rates</u>		
Tendered rates to include for the complete roof construction, including the design of the roof construction, all timber of required grade and type shown on the design, all cutting and waste, cutting to the exact lengths and end angles to manufacture the respective truss type, supply of all connector plates, fabrication of trusses, checking the completed truss for quality, loading up, transporting to the site of the works and off loading, storing under cover and protecting from the weather, hoisting up in position and erection of the roof truss structure, necessary supervision, submission of all shop drawings, design and erection guarantee certificates etc. as specified		
<u>ROOFS, ETC.</u>		
<u>Allow for the preparation and submission of the following documents in respect of all buildings:</u>		
1	Detailed shop drawings indicating truss sizes, truss positions, bracings, details, etc. to be submitted for approval prior the commencement of any fabrication	Item
2	Design certificate indicating the licensed programme used, SABS specifications adhered to, general procedures and loadings adopted, sizes and grading of timber components, details, etc.	Item
3	Erection guarantee certificate after the whole completed roof truss structure have been inspected, all defective work have been taken out and made good, etc. to the full satisfaction of the Representative/Agent	Item
