| GLASS AND GLAZING                           | Safety glass as supplied by the manufacturer to comply with AAAMSA and SANS 10400.                                                                                                                                                                                                                                                                                                                           | Safety glass as supplied by the manufacturer to comply with AAAMSA and SANS 10400.                                                                                                                                                                                                                                                                                                                           | 6.38mm white translucent safety glass to comply with AAAMSA & SANS 10400.                                                                                                                                                                                                                                                                                                                                                           |

**GENERAL**  
Screens shall be the Window Wall system as supplied by HBS Aluminium Systems or similar approved.  
Manufacture shall be in accordance with the current manuals as provided by HBS Aluminium Systems All aluminium work must comply with the latest edition of publications of Messer AAAMSA An AFSA Certificate of Conformance in respect of product finishes must be obtained.

**MATERIALS**  
Material shall be of 6063T6 aluminium alloy with a minimum structural wall thickness of 1.8mm. Outer frame to infill panels will be a nominal depth of 166 or 111mm.

**CONSTRUCTION**  
Outer frame to consist of a single part compensating head and jamb and continuous sub-Sill.  
Infill panels are to be constructed from double cavity tubular profiles, forming a wet cavity with drainage slots to allow for transom drainage to the exterior. All glazing rebates to be 25mm. Joints of the infill panels shall be notched and screwed to spigots with No 8 stainless steel screws. Where required, a 111mm or 166mm Split mullion assembly must be used to couple infill panels together, still making allowance for all thermal and dynamic movement. Door panels within the screens to have a 4-edge door rebate with gasket seal all round.

**INSTALLATION**  
All aluminium work to be done in strict accordance to the manufacturers specifications by a specialist firm. All openings to be checked on site before any materials are ordered or manufacture of window and door frames. Panel-by-panel installation from Inside or from Outside the building. All aluminium frame works to be provided with a continuous silicone seal around all construction openings.

**HARDWARE**  
All sashes to have mechanical Corner Connectors, wind locks and multi-point locking handles. Sashes not to exceed 1700mm wide by 1200mm high as per specification. Friction stay to suit max weight and size of Sash.  
Door hardware shall be compatible with the system and will take cognisance of the finish specification of the applicable area. See Hardware Schedule for door.

**FINISH**  
Sections will be painted in accordance with SABS1578, parts1 & 2. Powdercoat, and anodised aluminium, should be protected to prevent any damage or stain by cement, etc. All powder coating to be 25 micron thick and shall be executed in strict adherence to sabs 999

**GLAZING**  
Glass thickness should be in accordance with SANS 10400 and designed by a competent person.  
Glazing is to be carried out in accordance with SABS 0137, with particular attention to size limitations, packing and setting blocks.  
Thicknesses from 6-28mm.  
All glass panes to be marked for specification and thickness

**STRUCTURAL PERFORMANCE**  
System shall meet or exceed the requirements of SANS613 and the design loading determination by SABS 0160 for this application.  
Deflection of structural members shall not exceed L/175 or L/240+6mm as applicable.

**THERMAL PERFORMANCE**  
System shall comply with SANS204 in applications where Fenestration makes up more than 15% of Floor area.  
U-value with Air filled glazing units = 3.36  
For U-values below 3.38 use Argon or Krypton gas filled glazing units.
